SERVICE

Overview on our offerings

We put together individual service packages that are perfectly tailored to the needs of our customers. The following activities may be included to extend the service life of your SMS machine and to prevent damages that could result in long downtimes in your production:

OUR OFFERINGS

- Preventive maintenance through well-trained SMS service technicians
- Flexible solution packages tailored to your requirements
- Short service periods due to targeted remote diagnostics
- Use of original SMS spare-parts
- Control exchange and electrical revision

WE GUARANTEE

- Optimal performance of your machine
- Reliable production conditions
- Planned maintenance downtimes instead of unplanned production downtimes
- Inspection and maintenance intervals adapted to the production requirements

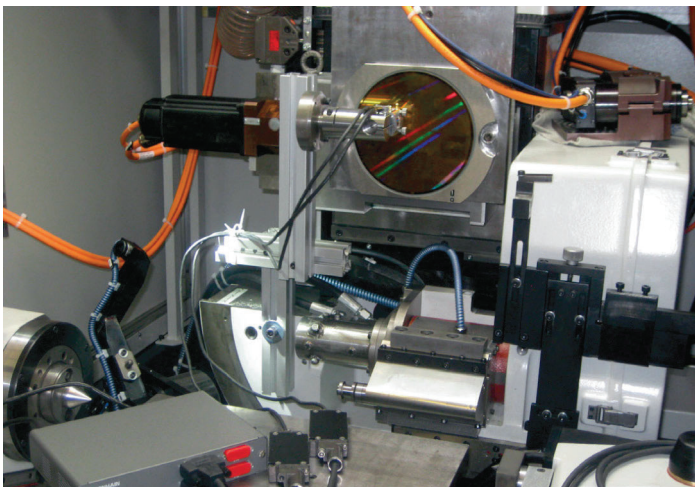

PREVENTIVE MAINTENANCE

Control / Electrical system:

- Data backup on your controls
- Machine service regardless of the manufacturer
- Service on all Siemens CNC controls
- Drive optimization
- Battery / fan replacement

Inspection of mechanics / pneumatics / hydraulics, in particular:

- Lubricating systems, Filters, Piping, Pumps, Compressed air systems, Leveling of the machine, Drive belts, Spindle cone, Covers and wipers, Piping, hoses, etc.
If necessary, faulty components are replaced.

We are also happy to carry out laser measurements and circular tests on your machines and advise you on questions about retrofitting, conversions or replacement of the controls.
